- Click & Go, for vehicle self-recognition
- Capacitive touch screen
- Docking station for maximum charging convenience
- Integrated with DoIP Smart for maximum market coverage
- Full MAHLE guarantee and reliability

MAHLE

TechPRO® PLUS

Extreme robustness

TechPRO® Plus is the right tool for the most active workshops, those that pass the diagnostic tool from hand to hand to speed up their work and optimize time. Tested to meet military standards, TechPRO® Plus does not fear any accidental fall (certified for fall up to 180 cm)

Enhanced connectivity

Access to information and diagnostic databases has always been the heart of the MAHLE line. Thanks to the enhancement of wireless connectivity everything is even easier and faster: Wifi, BT 5.1 and 4G LTE module for total autonomy when accessing the WEB.

Docking Station

The charging and support accessory of the TechPRO® Plus, makes it a true PC, which can potentially be exploited for other activities in the workshop.

Front and rear Cameras

The built-in camera allows easy access to vehicle recognition functions (Click & Go function, which detects the model by taking pictures of the license plate or VIN) and paves the way for new functions and ways of exchanging information through images.

DoIP accessory included in scope of delivery

TechPRO® Plus also integrates the new Diagnostics Over Internet Protocol cable in its configuration, to allow access to the diagnosis of those car models models that are now starting to be equipped with this high-speed communication protocol.

Technical data

TechPRO® PLUS

- Windows Enterprise operating system
- 10.1" LCD Touch Display
- 8 Mb Front and rear camera
